

L1: Updates for **tossatale** Website

Instead of Play fair font - use Sora font for headings and don't change the heading text to italic for few words. Keep the same way as it is.

Change the tossatale name to Lato font in header.

Hero Section Lines -

NEW STORIES. MORE OFTEN.

We are Storytellers, Always.

We write. We share stories. We welcome yours. Let's celebrate the stories that connect us all.

Instead of Start reading button - add Read Stories.
Remove the other one.

Near "New Stories" at top - remove the starting symbol and button type style and modify simply as a capital text.

Hero section image should not cut at the top and the bottom - it should appear fully, change accordingly. The image should not go behind the header. It should start after the header.

And remove the white shade at below, keep it as it is.

The hero section, pic and the text needs a change. I have shared a pic, the text should appear in the same way. Modify the text based on the hero pic at center of that towards left.

Header updates -

Update the header part as provided in the pic.

Header part should be in clear white, whenever we scroll the website from top to bottom, it should not show any refraction at the back side.

Footer updates -

Instead of Read - change to Explore

Under Explore - add Stories, Blog, Short films, Upcoming Projects

Under Community - add Newsletter(link to subscribe box) instead of The Journal

Under Legal - add Submission guidelines under Terms and conditions, Instead of Coming Soon - add Stay Tuned

Every word of the Page heading should have in capital letters in footer - for example: Privacy Policy, Terms & Conditions, About Us, Upcoming Projects, Short Films etc..

Add social media links under the tossatale description.

Change the tossatale font to Lato.

As you mentioned, I will change the rest which are allowed for me in the footer.

Home page

Add space a little after the hero section pic for editors pick stories

Inside them - remove the symbol Editor's Pick and add Featured Story in caps. Next to it its Genre. Remove the series one. Keep only one featured story box as how you kept first. But the thing is the text need to add a little extra it should fill till the end and to the next line. Add another like image carousal, add two dots down to it to indicate they are two.

Change the Author image naming MR to pics how I suggested at our previous google meet.

Reduce the size of the verified tic mark a little wherever it comes.

Instead of Fresh Link - add Newly added.

Instead of present published this fortnight text - add "From quick reads to stories in chapters."

Remove Series in the box. We need just its Genres.

I have one doubt here - if user did not sign in he stays in the guest mode so how does this heart and save later's options work?

Instead of Read most this week - change to "Reader Favorites"

Instead of trending on tossatale - change to "Trending Stories"

Tossatale - always "tossatale".

Change this layout add trending stories till to six stories same like - reference check here - <https://short-stories.co/>

Remove - (see the chart). We don't need any button here.

Please, remove complete story series block.

Instead of Curated shelves - add Your kind of read.

Instead of Assembled by our editors, the way you'd arrange a bookshelf - add "Stories that fit the moment."

In last box - add this heading "Late-Night Reads"

description - For nights when sleep can wait. Remove the current one.

Instead of Under ten minutes, complete in themselves - add "Short enough to finish. Good enough to remember."

Instead of

"Read without noise

No pop-ups, no autoplay. Just type on paper-white."

Add - Read at your pace

No rush. No rules. Just stories waiting for you. Rest all are fine.

Remove complete block of Featured writers.

Instead of WANDER A LITTLE - add Explore your way.

Instead of
FROM THE JOURNAL
Notes on craft & community

Add-More to discover- as small caption
FROM THE BLOG

Instead of Read the journal - Add "View all"

Instead of
The video library

Add - Latest Short Films

Instead of
Short films and writer conversations, shot the way we write.

Add - From stories to screen.

Instead of All Videos - add "View all"

Instead of subscription box at last

add this - Keep reading. Keep watching.
Get updates on new stories, short films, and upcoming releases. Add change it exactly reference -
<https://short-stories.co/>

Under dropdown of stories - add only All Stories and Short Films

ALL STORIES PAGE

Instead of
THE LIBRARY
Every story, shelved and waiting
9 published pieces across 8 categories. Filter until something feels like tonight.

Add -
ALL HERE
Stories we'd love you to read
Browse our original stories by genre, mood, or reading moment.

After the line showing 9 of 9 stories. Sorted by Newest.

Add this

Got time for a story?
Exactly like in reference -
<https://short-stories.co/>

This line -
Showing 9 of 9 stories · sorted by newest - Change to
Showing [X] of [Y] stories · [Sort order]
Where:

- **X** = stories currently displayed
- **Y** = total matching stories
- **Sort order** = Newest first / Oldest first / Most read, etc.

This line is at center, should it closer to the search box?

I will add others page by page, meanwhile you can update them.

Let me know for any clarifications.
